

# ohmage-OMH iOS Apps Installation Guide

## Step 1: Download and install the app(s)

Open this document on your phone to download and install ohmage, PAM, and Mobility using the provided links below

ohmage: <https://ohmage-omh.smalldata.io/ios/ohmage.html>

PAM <https://ohmage-omh.smalldata.io/ios/pam.html>

Mobility <https://ohmage-omh.smalldata.io/ios/mobility.html>

The following demonstrates the step-by-step instructions for downloading and the usage of ohmage app. PAM and Mobility are very similar to this.

Once you click the link, a pop-up (left image) will show. Please select *Install* then go back to your phone's home screen. The ohmage app icon should be displayed shortly

Click the ohmage app icon on your home screen

Please select *Trust* when another pop-up (left image) shows

\*\*\*You will see these pop-up windows (above and left images) during the installation of each app. Please make sure to always select *Install*\*\*\*

## Step 2: Create your Account

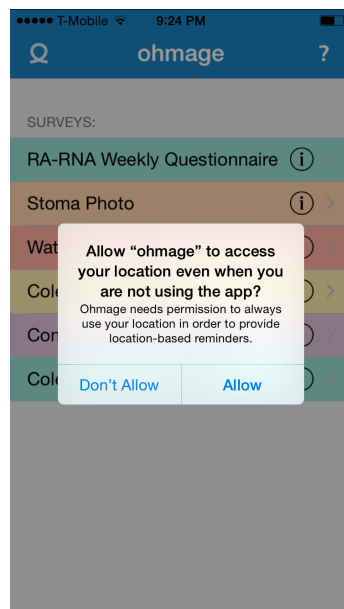

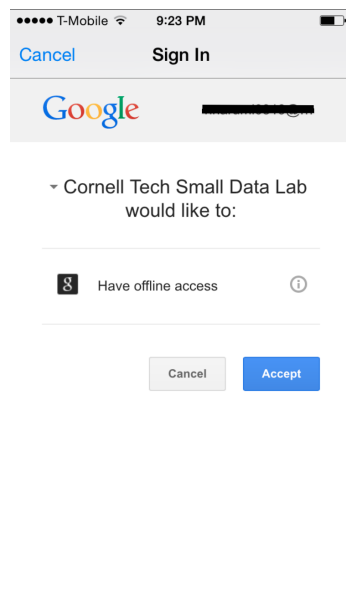

ohmage will launch and you will need to create your account via Google

Upon updating the apps, we decided to utilize Google Sign-in to facilitate the participant sign-in and on-boarding process. However, we are also implementing the function that allows participants who do not have a Google Account to sign in, and it will be available shortly

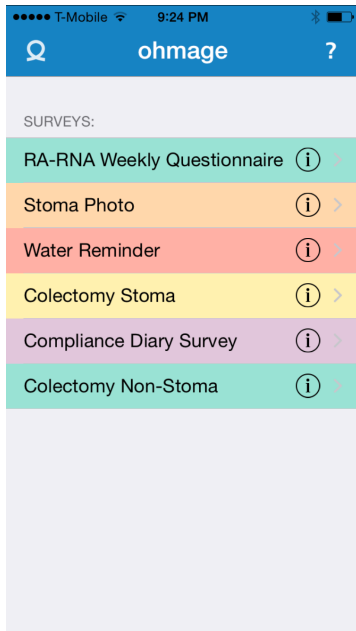

We do not store any personal information that users have with Google; therefore, your and participants' privacy will be protected

## Step 3: Log in Successfully

Accept Cornell Tech Small Data Lab to access your data and Allow ohmage to access your locations

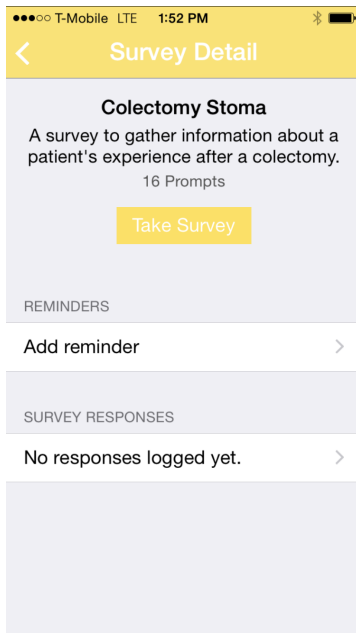

Once you've created your account, ohmage will log in and sync with the server to load your survey(s) on the home screen

The ohmage icon at the top-left corner is to review your account information

The question mark icon at the top-right corner will direct you to the ohmage website where you can find all the information regarding ohmage

## Step 4: Take a Survey!

Take your survey(s) at the time(s) instructed by your researcher(s)

When you tap the name of a survey, you will be entered into it

Many questions require an answer to proceed to the following questions

Some questions, however, do not require an answer to proceed, and you can tap the *Skip* button to disregard them. Even if you have already input an answer, skipping a question will clear the answer and prevent it from being recorded

If you want to change the previous answers, simply tap the *Back* button in the bottom left

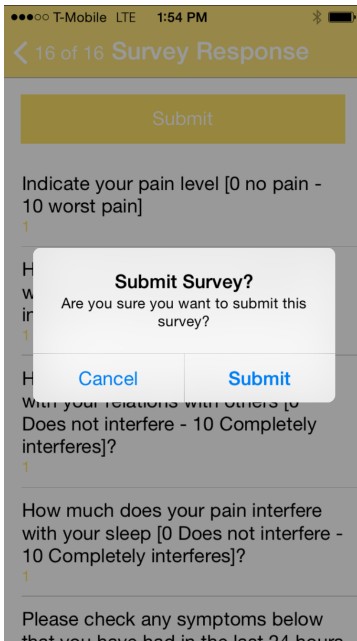

When you have answered all available questions, the summary of questions, your answers, and *Submit* button will show

You can still review the questions and your answers by tapping the arrow at the top screen

When you are ready to submit your answers, tap the *Submit* button

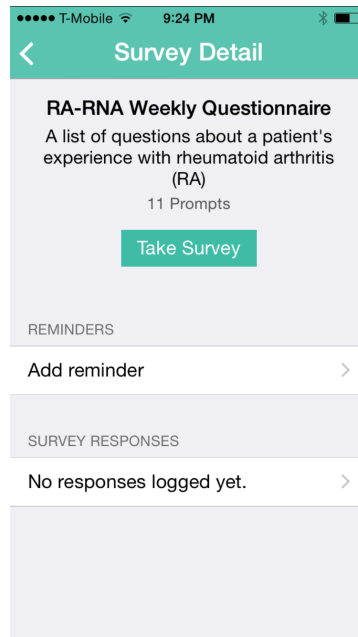

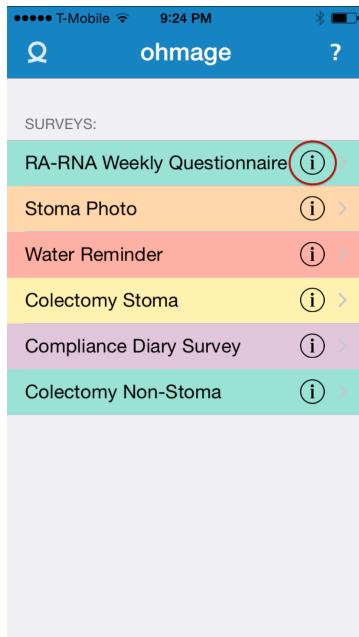

A confirmation pop-up will ask if you wish to proceed. Tap *Submit* button again to send and finish the survey. Tap *Cancel* button if you wish to change any answers

Once you finish taking the survey, your answers will be delivered to the ohmage server, and you will be directed back to the home screen

## Step 5: Set Reminders

Locate the “i” icon next to the survey that you wish to set up a reminder on the home screen

Tap *Add reminder* to create new reminders

If you wish to turn off reminders in the future, simply come back to this page and swipe left the bar next to the set time

Select *OK* to allow ohmage to send you notifications

### For Time Reminders: Left Tab

Adjust the time, date and frequency(the default is everyday) as you desire

If you do not have an exact time in mind, but would rather the reminder triggered at any point within a given window, set the time range

When you are satisfied with the reminder, tap “OK”

The screenshot shows the 'New Reminder' screen of an app. At the top, there's a status bar with 'T-Mobile', signal strength, time '9:25 PM', and battery level. Below the status bar is a teal header with 'Done', 'New Reminder', and 'Cancel' buttons. Underneath is a tab bar with 'Time Reminder' and 'Location Reminder' (the active tab). The main content area has four settings: 'Location' with a 'Select' button and chevron, 'Use time range' with a toggle switch, 'Repeat' with 'Everyday' and a chevron, and 'Ignore consecutive arrivals' with '120 min' and a chevron. A large grey rectangular area is at the bottom.

## For Location Reminders: Right Tab

Set the location that will trigger the reminder

If you only want the reminder to trigger within a given window of time, set the time range. The default frequency is everyday

When you are satisfied with the reminder, tap “OK”

If you need additional assistance or have queries regarding the apps, please contact [Narumi](#)
