Mobility-omh iOS Apps Installation Guide

*Mobility needs "Motion Sensor" to work which iPhone 5S or newer and some version of iPad have (see wiki)

Step 1: Download and install Mobility

Open this document on your phone to download and install Mobility using the provided link below

Mobility https://ohmage-omh.smalldata.io/ios/mobility.html

Once you click the link, a pop-up will show. Please select *Install* then go back to your phone's home screen*. The Mobility app icon should be displayed shortly

Click the ohmage app, and select *Trust* when another pop-up shows

Step 2: Create your Account

Mobility will launch and you will need to create your account via Google

Upon updating the apps, we decided to utilize Google Sign-in to facilitate the participant sign-in and on-boarding process. However, we are also implementing the function that allows participants who do not have a Google Account to sign in, and it will be available shortly

We do not store any personal information that users have with Google; therefore, your and participants' privacy will be protected

Step 3: Log in Successfully

Accept Cornell Tech Small Data Lab to access your data and *Allow* Mobility to access your location.

---For researchers---
To see the participants' data, please go to the dashboard and click *View* in the Participants page.
