# ohmage-omh Android Apps Installation Guide

Step 1: Download and Install the app(s)

In the Google Play Store, search for *ohmage-omh, PAM-omh or/and Mobility-omh*, and select the version of the application by small data lab

The following demonstrates the step-by-step instructions for downloading and the usage of ohmage app. PAM and Mobility are very similar to this

Accept the permissions, download, and install ohmage-omh
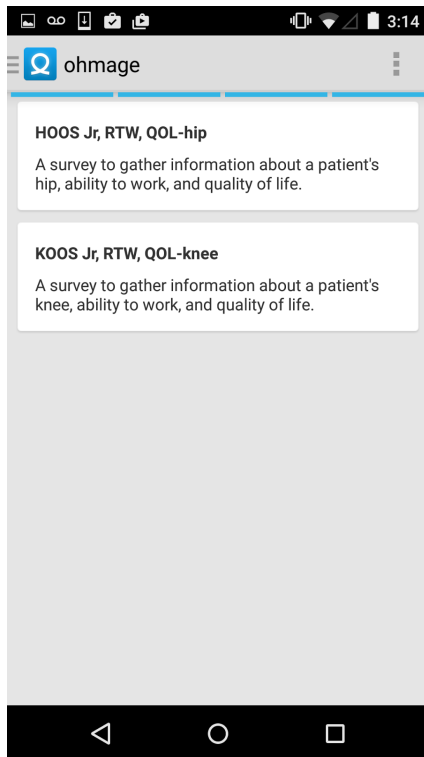

Step 2: Create Your Account

ohmage will launch and you will need to create your account via Google

Upon updating the apps, we decided to utilize Google Sign-in to facilitate the participant sign-in and on-boarding process. However, we are also implementing the function that allows participants who do not have a Google Account to sign in, and it will be available shortly

We do not store any personal information that users have with Google; therefore, your and participants' privacy will be protected
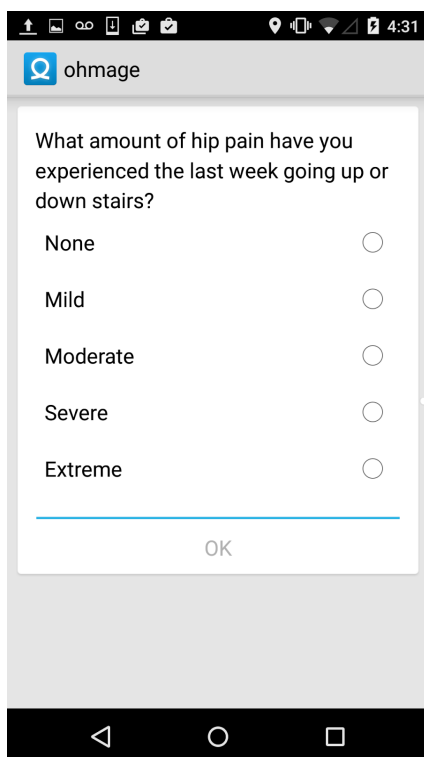

Step 3: Log in Successfully

Once you've created your account, ohmage will log in and sync with the server to load your survey(s) on the home screen

The ohmage icon at the top-left corner is used to access Home and Reminders

The three-dot icon at the top-right corner is used to access *Setting* and *Sign Out*

Step 4: Take a Survey!

Take your survey(s) at the time(s) instructed by your researcher(s)

When you click the name of a survey, you will be entered into it

Answered questions automatically scroll to the top of the screen as the next question appears at the bottom

Many questions require an answer to proceed to the following questions

Some questions, however, do not require an answer to proceed, and you can tap the *Skip* button to disregard them. Even if you have already input an answer, skipping a question will clear the answer and prevent it from being recorded

If you wish to change the previous answers, simply scroll back up

When you have answered all available questions, the screen will scroll up to show only the "Submit" button.
You can still scroll back up to review the questions and your answers before submitting them

When you are ready to submit your answers, tap the *Submit* button. Your answers will be delivered to the ohmage server, and you will be directed back to the home screen
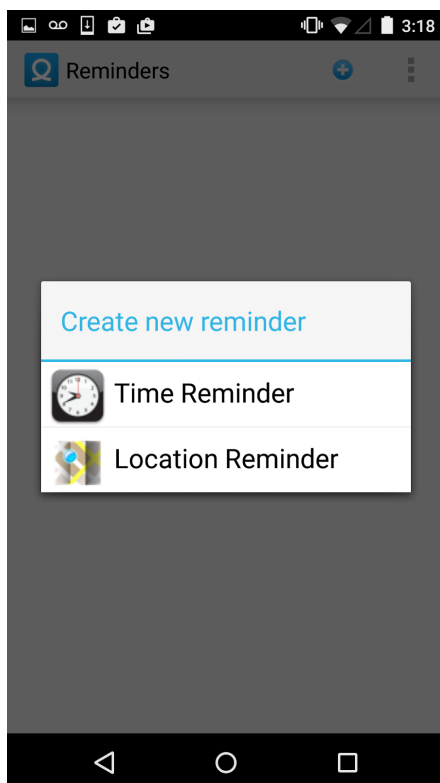

Step 5: Set Reminders
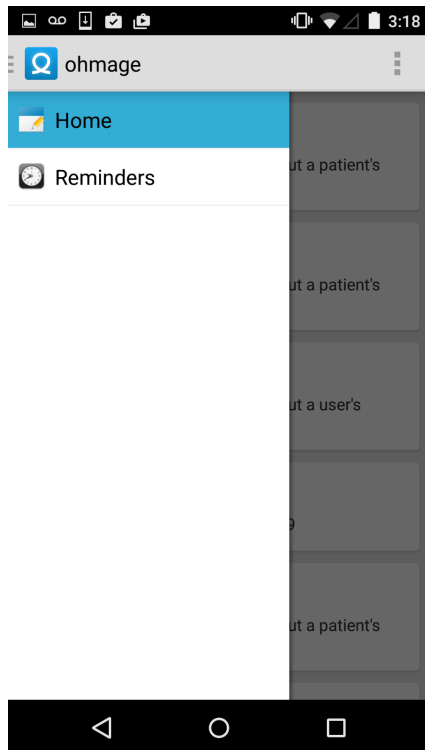

Tap the ohmage icon at the top-left corner on the home screen and select *Reminders*

To add new reminders, tap the blue plus icon at the top-right corner

A pop-up will appear to ask which type of reminder you would like: Time or Location

Select which type you want to create and fill in the fields as you desire

For Time Reminders:

Set the Survey(s) to be associated with this reminder

Set the reminder time you would like. If you do not have an exact time in mind, but would rather the reminder triggered at any point within a given window, set the time range

Set the day(s) that you require or desire this reminder to repeat. The default is everyday

When you are satisfied with the reminder, tap *OK*
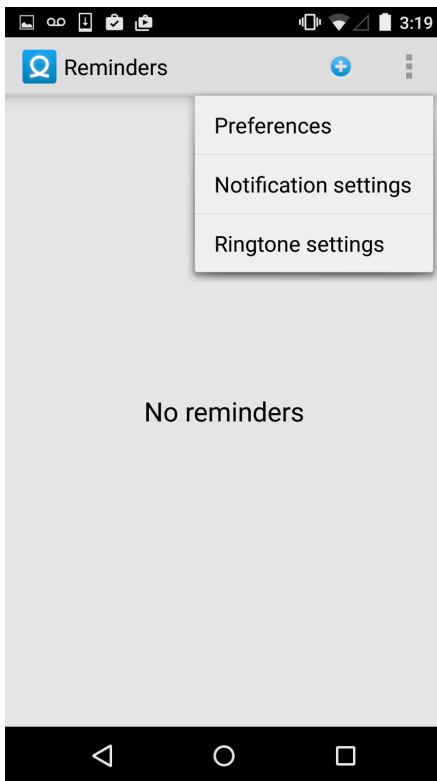

For Location Reminders:

Set the survey(s) to be associated with this reminder

Set the location that will trigger the reminder

If you only want the reminder to trigger within a given window of time, set the time range

The re-entry interval is the amount of time that ohmage will wait before triggering a second reminder if the location is left and later returned to

When you are satisfied with the reminder, tap *OK*

The Reminders Menu, opened through the three-dot icon in the upper right corner of the screen, allows you to access Preferences, Notification Settings, and Ringtone Settings

Preferences:
You can manage your saved locations for use in your location reminders

Notification Settings:

Notification Duration: how many minutes a reminder notification will remain in your phone's notification bar if you have not yet taken the survey
Suppression window/Remind Again: set snooze reminders at 5-minute intervals with the green plus icon and delete them with the red minus icon

If a reminder triggers and you do not take the survey immediately, the snooze reminders will trigger to remind you again
